

Mathematics 2005, Grade 4

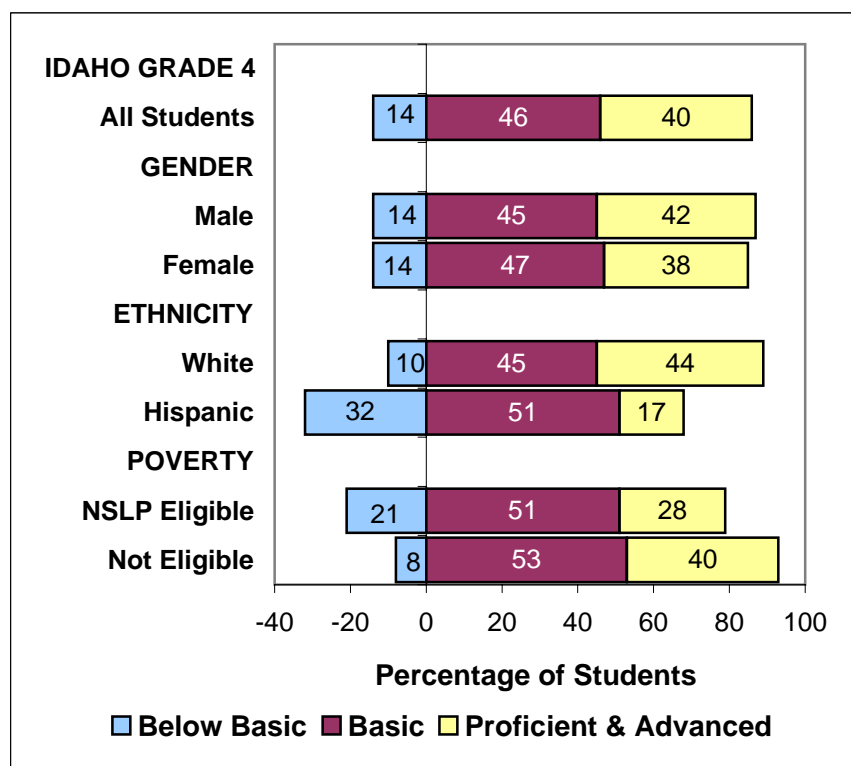

Mathematics Composite

Idaho NAEP Snapshot

Volume 2005, Number 15

The Mathematics assessment of the National Assessment of Educational Progress (NAEP) used multiple-choice and constructed-response questions to examine student skills with number properties and operations, measurement, geometry, data analysis and probability, and algebra. The math scale ranges from 0 to 500, where 214 is a *Basic* grade-level performance, 249 is *Proficient*, and 282 is *Advanced*.

Mathematics Performance Levels by Demographic Group in Idaho

- ◆ On the NAEP 2005 mathematics assessment, the percentage of fourth grade female students who scored at or above *Basic* (86 percent) was not significantly different from their male peers (86 percent).
- ◆ On the NAEP 2005 mathematics assessment, the percentage fourth grade White students who scored at or above *Basic* (90 percent) was higher than their Hispanic peers (68 percent). Sample size was not sufficient to permit a reliable estimate of mathematics performance for Black, Asian, and American Indian students.
- ◆ On the NAEP 2005 mathematics assessment, the percentage of Idaho fourth graders who qualified for free or reduced price meals in the National School Lunch Program scoring at or above *Basic* (79 percent) was lower than their peers who were not eligible for the program (92 percent).

Comparisons are based on statistical tests (.05 level) that consider magnitude of difference and standard errors.
